Data Flow Diagram

Created a Data Flow Diagram (DFD) that shows how data moves through the system - between external entities, processes, and data stores. Using the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	A person, organization, or system outside the project that sends or receives data (User, Google gemini AI).
Rectangle with numbered header	Process	An activity that transforms incoming data into outgoing data (User Authentication, FAQ Management, FAQ Search, AI Answer Generator, Validation and Error handling).
Rectangle (solid fill, no number)	Data Store	A place where data is held for later use (e.g., User Database, FAQ Database).
Labeled arrow	Data Flow	The movement of data between entities, processes, and data stores, labeled with what data is being passed (Authentication flow, FAQ management flow, FAQ search flow, AI answer flow, AI FAQ generation flow, Validation and error flow).

Diagram

The diagram below illustrates how the symbols above come together to form a complete data flow diagram.
